

ALCOTER

Coalescent Agent

Technical Specifications:

Item	DN-12
Appearance	Colorless and transparent liquid
Purity \geq %(GC)	99
Distillation Range(760mmHg $^{\circ}$ C)	251.0-259.0
Water Content \leq %	0.1
Acidity(AS HAC) \leq %	0.02
Color \leq (Pt-Co)	10

Application:

It can be effectively used in vinyl acetate homopolymers and copolymers and terpolymers latex, and acrylic, styrene and vinyl poly d, vinyl acetate latex. When it is used in latex paint and coating it has good resin compatibility and it is safe. Efficient and applicable to all types of synthetic resin and a new type of latex paint film forming agent.

Packing:

200 KGS/Iron Drum.

Storage:

Store in cool, dry, well-ventilated location, transport as common chemicals.
